Profile

Software Engineer with 7 years of experience in web development. Passionate about technology and with a strong commitment to quality, responsibility, and professionalism. Always eager to learn and grow, I am currently studying mobile app development with Flutter.

Latest Work Experience

Senior Software Engineer - Quick Kash (USA)

December 2022 - Present

Spearheaded the development and maintenance of the company's flagship Laravel 10-based product, ensuring its seamless operation and continuous growth. Introduced innovative features that enhanced user experience and boosted product adoption by 20%.

Backend Developer / L'avenir (Colombia)

Employee of the month - March 2022

September 2021 - December 2022

Led the development of a high-performance data import and export module for large-scale data management, significantly enhancing data processing capabilities. Designed and implemented multiple IVRs using PHPAGI for Asterisk, automating customer interactions and streamlining call handling processes. Contributed to the accelerated development of a new client project during a business trip to Bogotá, demonstrating adaptability and collaboration skills.

Co-Founder / Grupo Tera (Venezuela)

January 2019 - September 2021

I co-founded a software agency, and we were able to carry out great projects for several clients in the energy, construction and retail sectors using Laravel and Yii.

Full-Stack Developer / Carethy.es (Spain)

April 2018 - January 2019

I developed different integrations via API with multiple drop-shipping providers in the world, helping to make Carethy the biggest e-commerce site for personal and beauty care in Spain (the largest catalog in the world nowadays). Also, I developed with the team an incentive and gamified web platform for employees, which I enjoy a lot of doing it.

Web Development Leader / Cisneros Group (Venezuela)

January 2015 - April 2018

Spearheaded the development and implementation of high-profile web applications, including the Miss Venezuela Web App, the Miss Venezuela "Gala Interactiva" voting system, and the Noticiero Venevisión Web CMS, leveraging Laravel, JavaScript, and RESTful architecture to deliver exceptional digital solutions.
