Profile

Software Engineer with 10 years of experience in web development. Passionate about technology and highly committed to quality, responsibility, and professionalism. Always eager to learn and grow, currently expanding my skills in mobile app development with Flutter.

Latest Work Experience

Lead Software Engineer & IT Manager / Quick Kash (USA)
December 2022 - Present

I lead the development and maintenance of the company's flagship product, built on Laravel12, ensuring its performance, scalability, and continuous growth. I implemented new features that enhanced user experience, while maintaining high quality standards and a solid architecture. In addition, I am responsible for defining the company's technology strategy and making key decisions on tools, methodologies, and architecture, aligning innovation and efficiency with business objectives.

Backend Developer / L'avenir (Colombia) 🏅 Employee of the month - March 2022
September 2021 – December 2022

Led the design and development of a high-performance data import/export module for large-scale data management, significantly improving data processing efficiency. Built and deployed multiple IVRs using PHPAGI for Asterisk, automating customer interactions and streamlining call handling workflows. Contributed to the rapid development of a new client project during a business trip to Bogotá, showcasing adaptability and teamwork under pressure.

Co-Founder / Grupo Tera (Venezuela)
January 2019 - September 2021

Co-founded a software agency that delivered projects for clients across the energy, construction, and retail sectors, leveraging Laravel and Yii frameworks to build tailored digital solutions.

Full-Stack Developer / Carethy (Spain)
April 2018 – January 2019

Developed multiple API integrations with major global dropshipping providers, contributing to Carethy becoming Spain's largest e-commerce platform for personal and beauty care products — now hosting one of the world's biggest catalogs. Also collaborated on the creation of a gamified web platform for employee incentives — one of the projects I enjoyed the most.
